PTX Presents at NobleCon12

Melbourne, Australia: January 21, 2016 – Clinical stage oncology company Prescient Therapeutics Limited (**ASX:PTX**), today announced that Director, Mr Steven Yatomi-Clarke, has presented at the NobleCon12 - Noble Financial Capital Markets' Twelfth Annual Investor Conference at Club Med in Sandpiper Bay, Florida.

Following the Conference on 22 January 2016, a high-definition video webcast of Prescient Therapeutics Limited's presentation and a copy of the presentation materials will be available on the Company's web site <http://noble.mediasite.com/mediasite/Play/077aa262f93f4152891d344b839c310f1d>, or as part of a complete catalog of presentations available at Noble Financial websites: www.noblefcm.com, or www.nobleconference.com. You will require a Microsoft SilverLight viewer (a free download from the presentation link) to participate. The webcast and presentation will be archived on the company's website and on the Noble websites for 90 days following the event.

ENDS.

About Prescient Therapeutics Limited (PTX)

PTX is a clinical stage oncology company developing novel compounds that show great promise as potential new therapies to treat a range of cancers that have become resistant to front line chemotherapy.

Lead drug candidate PTX-200 inhibits an important tumor survival pathway known as Akt, which plays a key role in the development of many cancers, including breast and ovarian cancer, as well as leukemia. This highly promising compound is now the focus of three current clinical trials. The first is a Phase Ib/II study examining PTX-200 in breast cancer patients at the prestigious Montefiore Cancer Center in New York. A Phase 1b/2 trial of the compound in combination with current standard of care is also underway in patients with recurrent or persistent platinum resistant ovarian cancer at Florida's H. Lee Moffitt Cancer Center. These trials are funded in part by grants from the U.S. National Cancer Institute. In addition, PTX has recently received IND allowance for a Phase Ib/II trial evaluating PTX-200 as a new therapy for Acute Myeloid Leukemia.

PTX's second novel drug candidate, PTX-100, is a first in class compound with the ability to block an important cancer growth enzyme known as geranylgeranyl transferase (GGT). It also blocks the Ral and Rho circuits in cancer cells which act as key oncogenic survival pathways, leading to apoptosis (death) of cancer cells. PTX-100 was well tolerated and achieved stable disease in a Phase I trial in advanced solid tumors.

About Noble Financial Capital Markets

Noble Financial Capital Markets established in 1984, is an equity-research driven, full-service, investment & merchant banking boutique focused on the healthcare, media & entertainment, technology and natural resources sectors. The company has offices in Boca Raton, New York, Boston and Los Angeles.
